- Performs stress testing on a quarterly basis which enables the Company to estimate
 the liquidity requirements as well as adequacy and cost of the liquidity buffer under
 stressed conditions.
- Has also formulated a contingency funding plan as a part of the outcome of stress testing results.
- Monitors liquidity risk based on 'Stock' approach to liquidity by way of pre-defined internal limits for various critical ratios pertaining to liquidity risk.

The Company has diversified source of funding to ensure that there is no significant source, the withdrawal of which could trigger liquidity problems.

The Company monitors cumulative mismatches across all time buckets by establishing internal prudential limits. The Company maintains adequate liquidity buffer of readily marketable assets, to protect itself against any liquidity risk at the same time is mindful of the cost associated with it.

- 2. Total Liabilities represent 'Total Liabilities and Equity' as per Balance sheet less Equity.
- 3. Public funds are as defined in Master Direction Reserve Bank of India (Non-Banking Financial Company– Scale Based Regulation) Directions, 2023.
- 4. Other Short-term liabilities represent all Short-term borrowings other than CPs.

Disclosure on Liquidity Coverage Ratio (LCR):

As part of the Liquidity Risk Management Framework for NBFCs, RBI has mandated maintenance of Liquidity Coverage Ratio (LCR) effective 1st Dec 2020. The Company is required to maintain adequate unencumbered High Quality Liquid Asset (HQLA) to meet its liquidity needs for a 30 calendar-day time horizon under a significantly severe liquidity stress scenario. The objective of the LCR is to promote the short-term resilience of the liquidity risk profile. Presently, the Company is required to maintain a minimum LCR of 100%, effective December 1, 2024.

The LCR is calculated by dividing the company's stock of HQLA by its total net cash outflows over a 30-day stress period. "High Quality Liquid Assets (HQLA)" means liquid assets that can be readily sold or immediately converted into cash at little or no loss of value or used as collateral to obtain funds in a range of stress scenarios. Total Net cash outflows is defined as total expected cash outflows minus total expected cash inflows in the specified stress scenario for the subsequent 30 calendar days. The main drivers of LCR are adequate HQLAs and lower net cash outflow.

Major source of borrowings for the Company are Non-Convertible Debentures, Term loans from Banks, Commercial paper and Public deposits. Details of funding concentration from Significant counter party are given above under Public disclosure.

The average LCR for the quarter ended 30th September 2025 is 159.9% which is well above the regulatory requirement of 100%.
